EuCNC 2017 is the 26th edition of a successful series of technical conferences in the field of telecommunications, sponsored by the European Commission. The event will be organised in Oulu, Finland. It targets to bring together researchers from all over the world to present the latest research results, being one of the main venues for showcasing, demonstrating and trialling the results of research projects, especially, from successive European R&D programmes co-financed by the European Commission.

Workshop proposals are invited in all Tracks (a full list of topics being at the website):

- PHY - Physical Layer and Fundamentals
- RAT - Radio Access Technologies towards 5G
- WON - Wireless and Optical Networks
- NET - Networking
- APS - Applications & Services
- TER - Testbeds & Experimental Research

Workshops may address one or more Tracks, but they should be organised under a unified theme. Workshops are intended to allow projects or any other group of authors to present their own work.

Workshops may include invited speakers, papers, and panels. The structure of workshops is not fixed, and proposers may design it as they think best. Proposers are responsible for defining the full contents of the Workshop, namely the authors and presenters. It is not expected that open calls for papers are launched for Workshops, in order to attract authors or presenters.

Workshop papers can be either Presentations, Extended Abstracts (2 pages) or Full Papers (5 pages), and should be reviewed by the Workshop Technical Programme Committee. These papers will be part of the Conference Proceedings (if the authors wish to do so), but they will not be submitted to IEEE Xplore.

All participants and speakers in the Workshops, regardless of the nature of their presentation, including organisers, must pay the registration fee. Workshop organisers are offered 1 or 2 workshop registrations, respectively, for a half- or full-day workshop, being up to them to decide who'll benefit from these free registrations.

Workshops may extend for either a full- or a half-day, and they will be held in the day previous to conference start, i.e., June 12th, 2017.

Workshop proposals should be submitted via a specific template, according to the instructions available at the website. Proposers should provide information on the Title, Duration, Motivation and Background, Structure, and associated Technical Programme Committee.
