EuCNC 2017 is the 26th edition of a successful series of technical conferences in the field of telecommunications, sponsored by the European Commission. The event will be organised in Oulu, Finland. It targets to bring together researchers from all over the world to present the latest research results, being one of the main venues for showcasing, demonstrating and trialling the results of research projects, especially, from successive European R&D programmes co-financed by the European Commission.

Tutorials proposals are invited in all Tracks (a full list of topics is available at the website):

- PHY - Physical Layer and Fundamentals
- RAT - Radio Access Technologies towards 5G
- WON - Wireless and Optical Networks
- NET - Networking
- APS - Applications & Services
- TER - Testbeds & Experimental Research

Tutorials may address one or more Tracks, but they should be organised under a unified theme.

Tutorials are intended to target an audience that is a mixture of industry and academic attendees.

Tutorials lecturers are requested to send the presentations until 4 weeks prior to the conference, so that they can be distributed to participants.

Tutorials may extend for either a full- or a half-day, and they will be held in the day previous to conference start, i.e., June 12th, 2017.

Tutorials proposals should be submitted via a specific template and according to the instructions available at the website. Proposers should provide information on the Title, Duration, Motivation and Background, Structure, and associated Bibliography. Additional information on previous editions can also be provided, if applicable
