EuCNC 2020 is the 29th edition of a successful series of a conference in the field of telecommunications, sponsored by the European Commission. It targets to bring together researchers from all over the world to present the latest research results, and it is one of the main venues for demonstrating the results of research projects, especially from successive European R&D programmes co-financed by the European Commission.

Special Sessions proposals are invited in all Tracks (a full list of topics is available at the website):

- PHY - Physical Layer and Fundamentals
- RAS - Radio Access and Softwarisation
- NET - Network Softwarisation
- WOS - Wireless, Optical and Satellite Networks
- VAP - Vertical Applications and Internet of Things
- OPE - Operational & Experimental Insights

Special Sessions may address one or more Tracks, but they should be organised under a unified theme. Special Sessions are intended to allow projects or any other group of authors to present their own work.

Special Sessions may include one invited speaker, besides papers. Proposers are responsible for defining the full contents of the Special Session, namely the authors and presenters. It is not expected that open calls for papers are launched for Special Sessions, in order to attract authors or presenters.

Special Sessions papers can be either Extended Abstracts (2 pages) or Full Papers (5 pages), and should be reviewed by the Special Sessions organisers. These papers will be part of the Conference Proceedings, but they will not be submitted to IEEE Xplore.

All participants and speakers in the Special Sessions, regardless of the nature of their presentation, including organisers, must pay the registration fee.

Special Sessions extend for a conference time-slot, i.e., 1h40, and they will be held during the conference, in parallel to regular sessions.

Special Sessions proposals should be submitted via a specific template and according to the instructions available at the website. Proposers should provide information on the Title, Duration, Motivation and Background, and Structure.

Key dates: 2020 Feb. 07 – Special Sessions proposals submission deadline

2020 Mar. 20 – Notification of acceptance

2020 Apr. 24 – Special Sessions papers submission
