EuCNC 2020 is the 29th edition of a successful series of a conference in the field of telecommunications, sponsored by the European Commission. The conference focuses on various aspects of 5G communications systems and networks, including cloud and virtualisation solutions, management technologies, and vertical application areas. It targets to bring together researchers from all over the world to present the latest research results, and it is one of the main venues for demonstrating the results of research projects, especially from successive European R&D programmes co-financed by the European Commission.

We invite submissions in 6 tracks on a wide range of topics including but not limited to:

PHY - Physical Layer and Fundamentals

New air interfaces (5G, MTC, mmWave, etc.)
Beyond 5G, Terahertz communication
New modulation and coding techniques
New antenna arrays and antenna types
Reconfigurable radios and new radio heads
Advanced and massive MIMO
Hardware/Software co-design and implementation

RAS - Radio Access and Softwarisation

New spectrum management and sharing methods
Reconfigurable and energy efficient RRM
Modular and reconfigurable MAC
