

## Site Selection Guidelines

This document provides the guidelines for proposals to organise an edition of EuCNC & 6GS (European Conference on Networks and Communications & 6G Summit).

### Process

- The Steering Committee launches an open call for organising the conference, which is put also at the conference website.
- Potential applicants express their interest to organise the conference to the Steering Committee Chairperson.
- The Steering Committee Chairperson organises a meeting with potential applicants to clarify any aspects they would like to know about the organisation of the conference.
- Applicants submit their proposals to the Steering Committee Chairperson.
- Proposals are evaluated by the Chair and Vice-Chairs of the Steering Committee, resulting in their ranking.
- The ranking of proposals is taken to the Steering Committee for a final decision.

### Application

- The application should be done in the specified template.
- The template serves as both the list of requirements and the list of criteria to be taken for decision.
- The application should be sent to the Steering Committee Chairperson, Luis M. Correia, [luis.m.correia@tecnico.ulisboa.pt](mailto:luis.m.correia@tecnico.ulisboa.pt).
